TURKEYS

Farm Production, Disposition, and Gross Income 1961-62

The number of turkeys raised in 1962 was 92.3 million birds, 15 percent less than the record crop of 108.1 million in 1961, according to the Crop Reporting Board. The gross income from turkeys in 1962 was $352 million, 1 percent below the 1961 gross income of $356 million. The average price received in 1962 for turkeys sold was 21.6 cents per pound, compared with 18.9 cents per pound the previous year. Turkey prices during the first 6 months of 1962 were below a year earlier, while the last 6 months were well above the previous year.

There were fewer turkeys raised in 1962 than in 1961 in all regions. Decreases were 21 percent in the West North Central, 20 percent in the North Atlantic, 18 percent in the South Atlantic, 17 percent in the South Central, 13 percent in the East North Central, and 3 percent in the West. The West North Central States, the region of largest production, raised 33 percent of the Nation's turkeys in 1962, the West 28 percent, the East North Central 16 percent, the South Atlantic and the South Central 10 percent each, and the North Atlantic 3 percent.

The gross income in 1962 was less than in 1961 in all regions except two. Decreases were 13 percent in the North Atlantic, 9 percent in the South Central, 5 percent in the South Atlantic, and 2 percent in the West North Central. These decreases were nearly offset by a 1 percent increase in the East North Central and a 6 percent increase in the West.

Breeds Raised: Turkey growers raised 83.5 million heavy breed turkeys in 1962, compared with 95.4 million a year earlier--down 12 percent. The 1962 heavy breed turkey crop included 31.4 million heavy white, and 52.1 million other heavy. This compares with the 1961 crop of 32.6 million heavy white, and 62.8 million other heavy. The number of light breed turkeys raised in 1962 was 8.8 million, 31 percent below the 12.7 million raised in 1961.

Turkeys Sold: There were 92.0 million head of turkeys sold in 1962 (including home consumption), 15 percent less than the 108.2 million sold in 1961. Growers indicated that they sold as fryer-roaster 77 percent of their light breed production, 30 percent of the heavy whites, and 1 percent of the other heavies.

The death loss of poults in 1962 was 8.9 percent of those started, compared with 9.6 percent in 1961. Loss of breeding stock during 1962 as a percent of breeders on hand January 1, 1962 was 5.9 percent, compared with 5.3 percent a year earlier.

January 1 Breeder Hens: The number of heavy breed turkey hens on hand January 1, 1963 was 3,502,000 birds, 1 percent less than a year earlier. Light breed hens totaled 367,000, up 15 percent from January 1, 1962. The number of other turkeys (market birds and breeder toms) on hand January 1, 1963 was 2,729,000 birds, 4 percent more than a year earlier.

Turkeys: Farm production, disposition, and gross income, by States, 1961

1/ Does not include young turkeys lost.
2/ Loss during the year of turkeys on hand January 1. Less than 500 is shown as 0.
3/ Production is the number (or pounds) available for utilization during the year, i.e., sales plus home consumption plus or minus the change in inventory. Production also equals the number (or pounds) raised minus death loss of birds on hand January 1.
4/ Change in inventory numbers during the year.
5/ Includes consumption in households of producers which is less than 1 percent of production for the United States.

1/ Does not include young turkeys lost.
2/ Loss during the year of turkeys on hand January 1. Less than 500 is shown as 0.
3/ Production is the number (or pounds) available for utilization during the year, i.e., sales plus home consumption plus or minus the change in inventory. Production also equals the number (or pounds) raised minus death loss of birds on hand January 1.
4/ Change in inventory numbers during the year.
5/ Includes consumption in households of producers which is less than 1 percent of production for the U. S.
6/ Combined to avoid disclosing individual operations.
